

## SCOPE POINT OF SALES (POS)

Scope POS is a comprehensive Point of Sale (POS) solution for fast-paced, high-volume, multi-site retail operations. Whether you need to manage a single retail location, or face the challenge of tying together dozens of stores with multiple POS registers at each location, Scope POS offers you full integration with different solution.

## WITH SCOPE POS,

you can keep your finger on the pulse of your retail activities. Integration with all retail technologies (including barcode scanners, barcode labeling and more) further increase your check-out speed and accuracy while providing real-time integration and reporting across the enterprise.

Scope POS understands that business owners need to control their inventory and employees. It helps serious business owners control their growth and success. We believe businesses in control, save time, reduce losses, increase profit and productivity. Whether you have one or several locations, Scope POS software gives you "the power to take control".

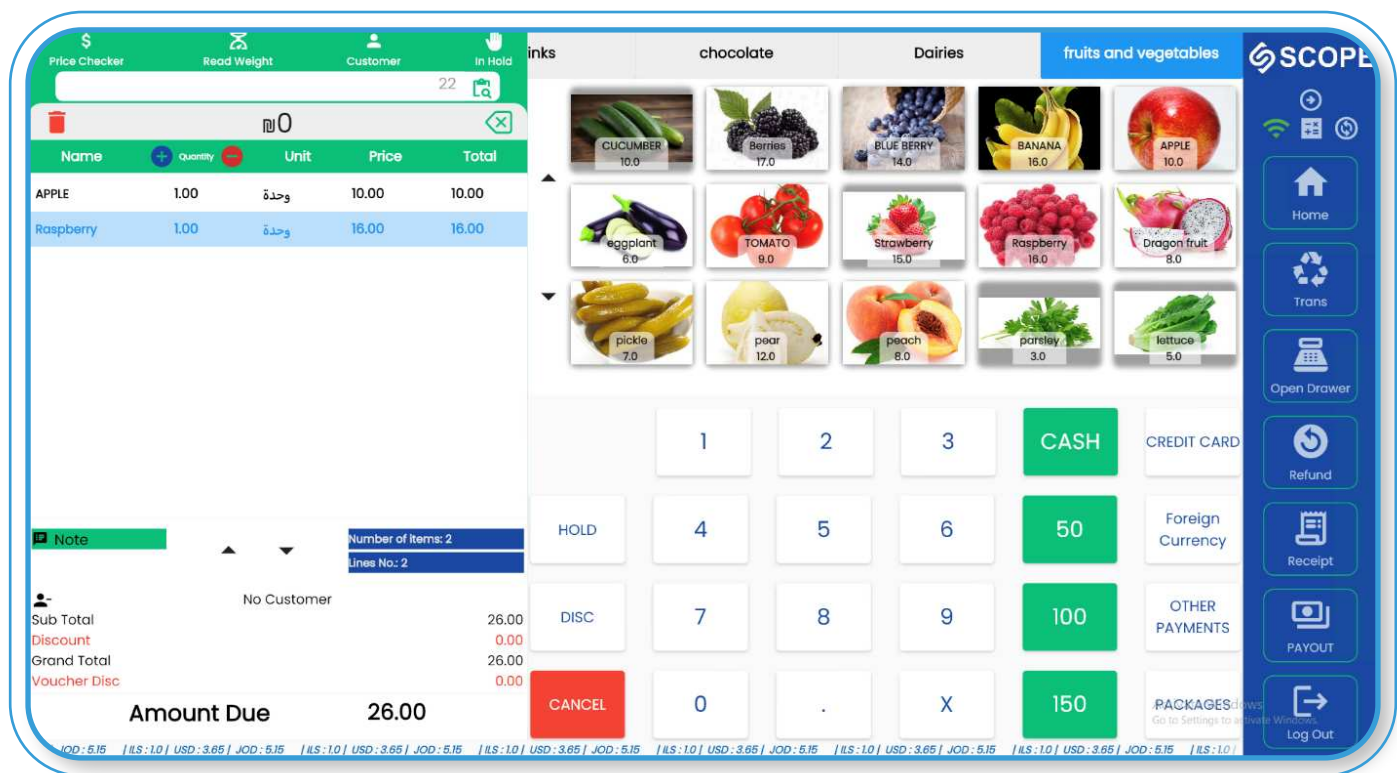

### REAL BUSINESS BENEFITS:

Scope POS offers a breadth and depth of features that are not commonly found in other POS solutions. From improved efficiency to complete integration with other ERP, POS boosts your business productivity.

It benefits medium and large companies wanting to proactively address current market challenges. It will bring the following benefits:

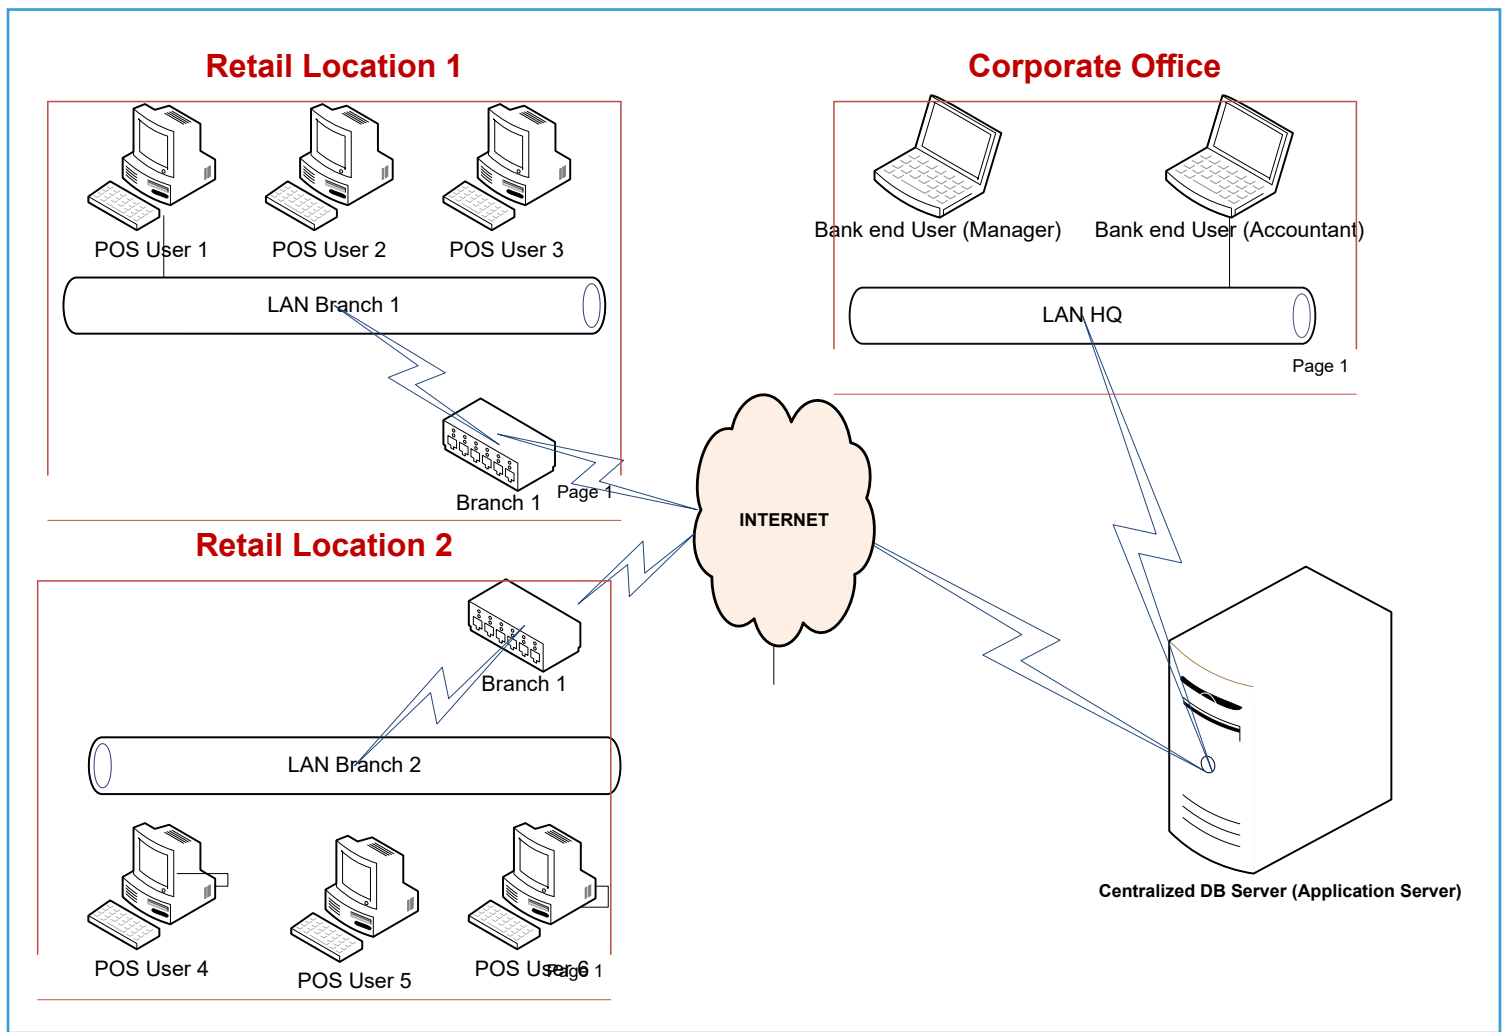

- ✔ **Connected Retail Stores:** Scope POS supports multiple sites connected over a local area network (LAN) Wide Area Network (WAN) or Internet and links remote retail locations to your head office over the Internet.
- ✔ **Real-Time Visibility:** Scope POS provides real-time validations and updates to and from the centralized inventory and customer database. Real-time integration saves you valuable time by eliminating month-end reconciliation procedures. In addition, all sales and customer-related reporting can be generated from the central database.
- ✔ **Security:** It provides user access security at a detailed POS function level. Scope POS server encrypts the user password being transferred to the POS, ensuring secured transmissions over the Internet.
- ✔ **Complex Pricing:** It integrates with the ERP or Accounting Inventory Control and Accounts Receivable modules or any ERP to ensure accurate pricing.
- ✔ **Easy Operation:** It is easy to use. Single keystroke options and short cut keys are available for many common operations such as sale completion, payment, item information. Fast checkout – only 1 to 3 clicks to make the sale
- ✔ **Integrated Receivables:** It enables selling to accounts receivables customers (on-account). You can check customers' credit limits, pricing levels, active and inactive status, and prohibit sales to on-hold customers. New customers can be defined in it and their data can be auto-populated in the Accounts Receivable module.
- ✔ **Multi-language:** Scope POS supports a multilingual It also supports screen layout modification for efficient interaction with the application.
